

Amendments to the Claims

1. (Currently Amended) A corrugated cardboard blank for construction of a support, the ~~support~~ blank comprising two main body forming panels, a middle panel between said body forming panels and ~~an~~ two end flap flaps provided at one end of each main body forming panel, each end flap having a length substantially the same as the length of the middle panel, each main body forming panel and the middle panel having opposing side flaps, ~~and~~ each side flap of the main body forming panels being provided with an indent wherein an indent on one of each opposing side flap has a rounded surface and an indent on the other opposing side flap has an angular surface ~~characterized in that each end flap has a length substantially the same as the length of the middle panel.~~
2. (Currently Amended) A corrugated cardboard blank as claimed in claim 1 wherein the opposing side flaps of each main body forming panel are a mirror image of one another.
3. (Cancelled)
4. (Currently Amended) A corrugated cardboard blank as claimed in claim ~~3~~ 2 wherein one of the end flaps is provided with side flaps.
5. (Currently Amended) A corrugated cardboard blank as claimed in claim 4 wherein ~~a~~ each tab is provided at an end of the indented region of ~~on each of the side flaps~~ flap remote from ~~of the main body forming panels~~ panel.
6. (Previously Presented) A corrugated cardboard blank as claimed in claim 5 wherein each tab is provided at the remote end of the indented region of each side flap.

Attorney Docket No. 78803.03501
S/N 10/509,301

7. (Previously Presented) A corrugated cardboard blank as claimed in claim 6 wherein a line of weakness is provided between each tab and its adjoining side flap.
8. (Previously Presented) A corrugated cardboard blank as claimed in claim 7 wherein each side flap of the main body forming panels, middle panel and/or end flap is provided with one corner that forms substantially a right angle and an opposing corner which is truncated.
9. (Currently Amended) A corrugated cardboard blank as claimed in claim 8 wherein each tab provided on the side flaps of the main body forming panels extends from the truncated ~~end~~ corner of the side flap.
10. (Currently Amended) A corrugated cardboard blank as claimed in claim 9 wherein fluting is provided in the longitudinal direction of the blank, being from one end flap to the other end flap.
11. (Currently Amended) A corrugated cardboard support formed from a blank, the support comprising two substantially parallel opposing main body forming panels and two pairs of opposing side walls, wherein each of one pair of opposing side walls are is formed from at least two interlocking parts, one of the other pair of opposing side walls is formed from two end flaps provided at one end of each main body forming panel, each end flap being substantially the same length as its opposing side wall and the other side wall of the pair being formed from a middle panel between said body forming panels, and wherein said interlocking parts are provided by opposing indents provided on each part of each of one pair of opposing side walls, wherein one indent has a rounded surface and the other has an angular surface enabling the support to be moveable from a collapsed state to an erect state characterized in that one of the other

Attorney Docket No. 78803.03501
S/N 10/509,301

~~pair of opposing side walls is formed from two end flaps provided at one end of each main body panel, each end flap being substantially the same length as its opposing side wall.~~

12. (Currently Amended) A corrugated cardboard support comprising two substantially parallel opposing main body forming panels and two pairs of opposing side walls wherein each of one pair of opposing side walls ~~are~~ is formed from at least two interlocking parts, one of the other pair of opposing side walls is formed from two end flaps provided at one end of each main body forming panel, said interlocking parts enabling the support to be moveable from a collapsed state to an erect state such that one of the other pair of opposing side walls is formed from two end flaps provided at one end of each main body panel, each end flap being substantially the same length as its opposing side wall and the other side wall of the pair being formed from a middle panel between said body forming panels, and wherein said interlocking parts are provided by opposing indents provided on each part of each of one pair of opposing side walls, wherein one indent has a rounded surface and the other has an angular surface, the support being constructed from a blank according to claim ~~40~~ 1 by folding the appropriate parts of the blank and securing them together by suitable means.

13. (Original) A corrugated cardboard support as claimed in claim 12 wherein adhesive is used to secure the parts of the blank together.

14. (Currently Amended) A corrugated cardboard support as claimed in claim 12 wherein the side flaps of one of the main body forming panels are folded and secured to the side flaps of the middle panel, the side flaps of the other main body forming panel are folded and secured to the side flaps of one of the end flaps and one of the end flap

Attorney Docket No. 78803.03501
S/N 10/509,301

flaps is folded over and secured to the other end flap and wherein opposing a main
~~panel and the~~ side flaps of the each main body forming panel ~~panels~~ are ~~not~~ secured to
~~each other~~ by said interlocking parts.

15. (Currently Amended) A corrugated cardboard support as claimed in claim 14
wherein the side flaps of the main body forming panels are secured to the side flaps of
the middle panel and one of the end flap flaps by means of ~~the~~ tabs provided on the
side flaps of the main body forming panels.
